

# About U:GEN Collagen

U:GEN collagen helps to smooth wrinkled areas and some types of scars by supplementing collagen directly into the skin layer

## Creating Volume

When injected into the dermal layer, collagen is immediately filled the skin layer to create volume

## Skin Elasticity Restoration

Enables collagen to recharge and regenerate itself

## Improves Skin Tone and Increased ECM

Improves skin tone by regenerating skin cells

## Collagen + PRP

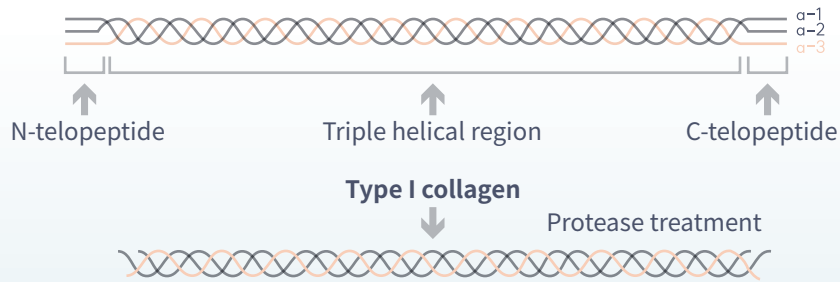

The effect can be maximized by performing collagen injection and PRP together

## Inhibits Pigment Formation

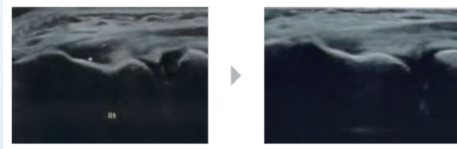

Improves melanin pigmentation by suppressing the activity of skin pigment tyrosinase

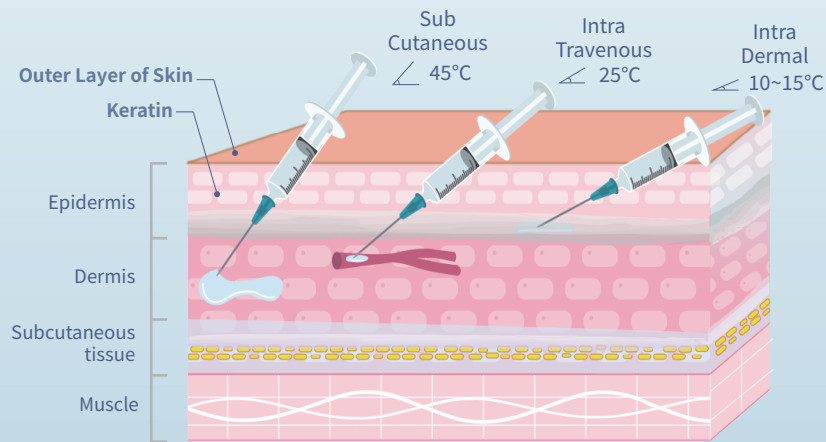

# \* Atelocollagen?

The tissue reconstruction effect of Atelocollagen

## ● Type of Injections

- ✓ Because it is non-antigenic, there is no risk of side effects such as foreign body sensation or infection.
- ✓ Excellent biocompatibility and metabolized and absorbed in a short period of time
- ✓ The maintenance period is long, approximately 1 to 1.5 years
